# LUIS ALEJANDRO HINOJOSA PÉREZ

ENGINEER OF SYSTEM COMPUTER  
FRONTEND & QA

## LABORAL EXPERIENCE

**Company:** AgaveLab

**Role:** QA trainer

**Start date:** February 2023

**End date:** June 2023

### Main Activities:

- Sprint planning with the development team for activity allocation (twice a month).
- Daily meetings with the work team to present the status of activities designated in the sprint planning.
- Conducting integration, unit, stress, smoke, and functional tests within the assigned Voxfeed project.
- Creation of the aforementioned tests on iOS, Android, and Web platforms.
- Documentation of the aforementioned conducted tests.
- Identification and assignment of issues (enhancements/bugs) detected during the testing phase.
- Coordination with the development team for production releases.
- Creation of Release notes on GitHub.

**Company:** Capgemini

**Role:** Java Full Stack Developer

**Start date:** June 2022

**End date:** November 2022

### Main activities:

- Meetings with the development team to assign project activities (tickets) to be done. In my case, I am part of the Java full-stack development.
- Meetings with the development team and the client to showcase progress and address any issues or questions.
- Execution of the activities (tickets) assigned by the team leader, including uploading the progress on GitHub and updating the ticket status to inform the QA department.
- Participation in training sessions and courses provided by the company.

**Company:** Transportistas Unidos Ejido Morelos S. A. de C. V. (TUEMSA)

**Role:** In charge of purchases (spare parts), providers and computational engineer of system

**Start date:** June 2021

**End date:** June 2022

### Main activities:

- Maintenance of TUEMSA's intranet.
- Maintenance of the website and email accounts of TUEMSA.
- Repair and maintenance of the tractor trucks' video surveillance equipment.
- Repair and maintenance of the company's computer equipment.
- Scanning of tractor trucks using Cummins Insite and Detroit.
- Capture of internal inventories from the departments of suppliers, spare parts, and computer systems.
- Receipt of suppliers for TUEMSA.
- Purchase of spare parts for tractor trucks and video surveillance equipment.
- Support for the company's departments including diesel, finance, human resources, monitoring, and logistics.
- Creation of visual resources for the company such as videos, images, logos, ID badges, etc.
